

AIR PRESSURE SWITCHER

DPS100

Application

DPS100 air differential pressure switch air conditioning system and heat source is used for air pressure measurement and monitoring of equipment, the alarm signal can easily adjust the set pressure value, and can be easily installed products.

- Filter clogging monitoring
- Duct static pressure / wind alert
- Burner pressure monitoring

Technical Data

• Range	: 50~500 / 100~1000 / 500~2000pa
• Max. Medium Pressure	: 1000pa
• Working Temperature	: -15°C .. + 60°C
• Protection Level	: IP54
• Output Contact Capacity	: 205V 21, Contact shift.
• Weight	: 100g
• Accessories	: HI/LO Pressure Probes.

Shape Dimension
